

KEEN 17 TV is a low power, Class A television station that broadcasts on UHF Channel 17 from a tower owned by AT&T near the intersections of Tule Springs and Farm Roads. We have moved from North Las Vegas to a temporary administrative office in Las Vegas and are awaiting completion of an office building in the Northwest Valley for our permanent move.

Our programming, which is on 24 hours a day, seven days a week, includes local and national ministry shows as well as family shows, which are programmed at our parent company, Total Living Network, based out of Aurora, Illinois. Specific schedules can be viewed at our website, www.keentv.com. Information on our parent company can be found at www.tln.com.

At our new facility, at the intersection of Elkhorn and Durango in the Northwest Valley, we plan to have several small administrative offices as well as a small studio to tape local ministry programming. Shows are usually taped with one camera and a "green screen" behind the host.

We have already contacted the building owners regarding the placement of an 18" microwave dish on the roof of the building. Optima Network Services, Inc., of Los Angeles, California, is assisting us with all of the engineering criteria.

In the past, we have been fortunate to have had Mayor Goodman present KEEN 17 TV with a Proclamation for KEEN 17 TV Day, and we hope to continue serving the families of Las Vegas with our programs and outreach.

If you have any questions or concerns, please feel free to contact me.

Warmest regards,

Kevin Culbertson
